1,500,000

registered agents

17,000

human owners

88 : 1

Wiz: the platform had no mechanism to verify whether an 'agent' was AI or a human running a script.

About 1.5 million registered 'agents' and about 17,000 human owners, according to the Wiz investigation. Registrations do not measure activity or autonomy; the platform had no mechanism to verify whether an 'agent' was AI.
