SHADOW 06 / FIGURE 6

Providers, one table

FIELD	ANTHROPIC	GOOGLE	OPENAI
Image / video / audio mark	C2PA signatures on supported generated files; separate multimedia watermark not found	SynthID watermark (portal also checks partners' content)	SynthID watermark + C2PA metadata on images; supported audio since Jul 2026
Text mark	A version of SynthID-Text on supported models, worldwide subject to model/feature/platform support	SynthID-Text	Text watermark: ChatGPT/Codex text marked by default in the EU only; API opt-in, off by default
Who can check (hosted)	Files: free content checker + C2PA tools; text: detection API in private preview	Public portal for images, video, audio	Images and audio: public verifier + API; text detector: approved researchers only
Detector code / verification tooling	Text production-detector source: not found. File credentials: verification with compatible C2PA tooling is documented, including the open-source c2patool.	SynthID-Text reference code public, incl. detection ("not intended for production")	Announced intent to open-source
Published text robustness evaluation	No Claude-specific numerical robustness evaluation comparable in reporting form to the other table entries was found	Peer-reviewed (Nature 2024): evaluation incl. edits and paraphrasing; numbers in Supplementary C.6	Provider's own (5 Oct 2026), 1% FPR target: ~80% detected at 200 tokens, ~95% at 400 tokens (psychology); lower for mathematics. Synonym substitution on 400-token English answers: 10% of words → 92% to 66%; 25% → 17%
Self-stated limits	Short text weaker; mark is not complete authorship; missing credentials not human origin	Watermarks weakened by edits; vulnerable to stealing, spoofing and scrubbing; coordination among providers can broaden coverage	Absence of a mark does not establish human authorship

FOOTNOTE 1

Each provider's column had an independent reviewer; see Method.

FOOTNOTE 2

Figures come from different implementations, corpora and operating points. No ranking is implied.

FOOTNOTE 3

"Not found" means not located in the stated review; it does not establish non-existence, concealment, unlawfulness or non-compliance.
