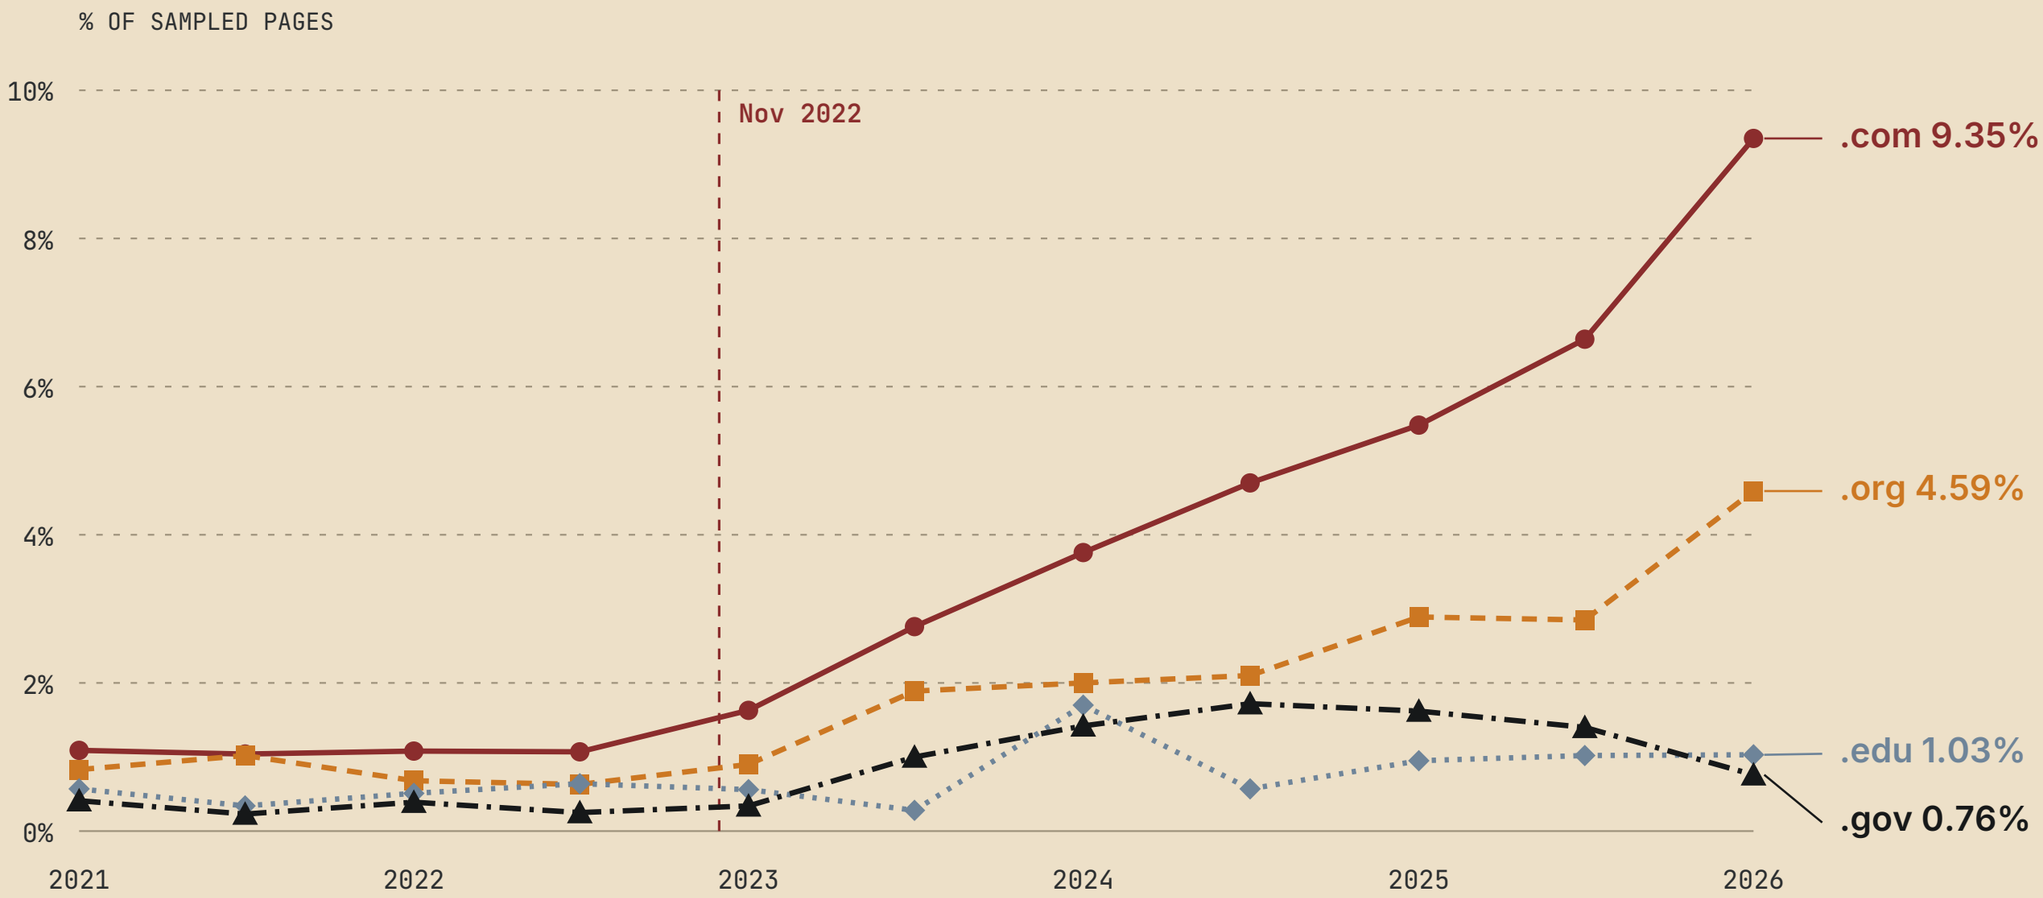
SHADOW 06 / FIGURE 1

Signs of AI authorship by web domain, 2021–2026



CAVEAT

Pew's detector flags pages written or substantially edited with AI, and misclassifies individual pages in both directions. Pew reports a higher false-positive rate on pre-AI pages.

Six-month averages for four domains. Rates were similar at the start of the period; in the period labelled January 2026, .com reached 9.35%, against about 1% on .edu and .gov.

SOURCE Pew Research Center, 'How much of the internet is written with AI?', 20 Aug 2026. Plotted points are six-month averages.
